FY 2024: EBIT more than doubled

Daldrup & Söhne closed 2024 extremely successfully: the company managed to increase EBIT from EUR 2.6m (FY 2023) to EUR 6.9m. At EUR 54.6m, its total output was significantly higher than the previous year (EUR 48.4m). The consolidated net profit for the past business year amounted to EUR 2.5m (FY 2023: EUR 0.9m). EPS thus amounted to EUR 0.42 (previous year: EUR 0.15).

Its equity ratio is comfortable at 68.8% (previous year: 50.6%). As of the balance sheet date of 31 December 2024, Daldrup also had cash and cash equivalents of EUR 6.4m (previous year: EUR 3.6m). Due to smart working capital management and higher earnings, cash flow from operating activities increased from EUR 3.5m (FY 2023) to EUR 12.1m. After taking investments into account, its free cash flow jumped to EUR 9.7m (previous year: EUR 0.5m). The company was able to turn a net debt position (EUR 4.2m in FY 2023) to a net cash position of EUR 4.8m – a EUR 9m improvement.

Guidance: the company expects to generate total output of around EUR 52m in FY 2025 and to achieve an EBIT margin of between 9% and 12% of total output. We regard this outlook to be conservative; one should keep in mind that there is substantial support from the government and state authorities in addition to original, fundamental demand for Daldrup's services. We therefore confirm our Buy recommendation and increase our TP to EUR 18.00 to reflect its improved cash position.

Tailwind from the government and state organizations fuels long-term growth prospects

For sure, its core segment is geothermal energy; the new federal government has announced further legislative initiatives in its coalition agreement: the introduction of an instrument to hedge exploration risks, an increase in federal funding for efficient heating networks (BEW), and the implementation of the Act to Accelerate Approval Procedures for Geothermal Energy Plants, Heat Pumps and Heat Storage Facilities (GeoWG).

But also, its other big segment – resources & exploration – enjoys a tailwind from the government: the investment program announced by the new German government with special funds for upgrading infrastructure, for example in road, tunnel and bridge construction. Here Daldrup drilling services come into use again, as they are used for tunnels, bridges, etc. as test drillings are essential for such construction measures.

Business areas

Geothermal Energy

In the Geothermal Energy division, drilling services are provided both for near-surface geothermal energy for drilling depths of up to 400 meters, medium-depth geothermal energy and deep geothermal energy with drilling depths of up to 6,000 meters in order to harness the geothermal energy accessible through drilling for the generation of electricity and / or heat.

The focus of Daldrup's activities in Germany continues to be in the key geological regions for geothermal energy development: the Bavarian Molasse Basin around the city of Munich, the Upper Rhine Graben and the North German Plain. In Europe, activities in FY 2024 continued to focus in particular on Germany and Switzerland.

The Geothermal Energy division accounted for 44% of Daldrup's sales in 2024 (previous year: 53%).

Raw Materials & Exploration

In the Raw Materials & Exploration division, the drillings carried out by Daldrup are used for the exploration and development of deposits, primarily of mineral raw materials and ores. Another focus is on work to explore and secure the subsoil in mining areas or in road, bridge, tunnel and civil engineering construction.

In the 2024 financial year, this division included gas relief wells in the Ruhr region, for example. This division accounted for 46% of the company's sales in 2024 (previous year: 42%).

Water extraction

The water extraction division includes well construction for the extraction of drinking water, industrial water etc. The water extraction division represented 2% (previous year: 2%) of the sales of Daldrup in the reporting year.

Environment, Development, Service (EDS)

The Environment, Development, Service (EDS) division comprises special environmental services such as the hydraulic remediation of contaminated sites, the construction of gas extraction wells for the extraction of landfill gas, the construction of groundwater quality measuring points and the construction of water purification plants. The EDS division generated a share of 8% (previous year: 3%) of the company's sales in the 2024 financial year.

Balance sheet – noticeable developments

Assets

Trade receivables were significantly lower than in the previous year and amounted to around EUR 4.5m as at the reporting date (FY 2023: EUR 9.3m).

Cash and cash equivalents increased to EUR 6.4m in FY 2024 (previous year: EUR 3.6m) and therefore exceeded the previous year's figure by around EUR 2.8m.

Equity & liabilities

On the liabilities side of the balance sheet, the equity of Daldrup increased to a total of EUR 23.5m as at December 31, 2024 (previous year: EUR 21.0m). The equity ratio amounted to a comfortable 68.8% (previous year: 50.6%) of the balance sheet total.

Despite investments made, liabilities to banks fell to EUR 1.6m (previous year: EUR 7.7m).

Valuation

We have decided not to carry out a peer group valuation, firstly because there are hardly any comparable listed companies and secondly because Daldrup prepares its accounts in accordance with conservative German accounting standards (HGB). We therefore apply a DCF valuation:

DCF valuation

Our DCF model indicates a fair value of EUR 18.04 per share for Daldrup and reflects the long-term perspectives of the company. The increase in fair value essentially reflects a higher cash position. Our assumptions are as follows:

Phase 1 (2025e-27e):

We estimated the free cash flows (FCF) of phase 1 according to our detailed financial forecasts for this period stated in the financials section.

Phase 2 (2028e-34e):

For Phase 2, we assumed an initial sales growth of conservative 3.5%. The growth fades out to 0.9% in 2034e. We assumed an EBIT margin of 10%.

Phase 3:

For the calculation of the terminal value, we applied a long-term FCF growth rate of 2.0% to reflect Daldrup's growth perspectives.

Based on these assumptions, we calculated a fair value of the Daldrup's operating business of EUR 103m. We added its net cash position of 31 December 2024. The resulting fair value per share amounts to EUR 18.04.

Company description

Daldrup & Söhne AG, with a company history of more than 75 years, is a specialised provider of drilling and environmental services and is positioned among the leading companies in Germany. Its activities are divided into the business areas Geothermal, Resources & Exploration, Water Extraction and Environment, Development & Services (EDS). In the Geothermal Energy business sector, drilling services are provided both for near-surface geothermal energy (especially geothermal probes for heat pumps), but above all also drilling services for deep geothermal energy of up to 6,000 m, in order to use the geothermal energy thus accessible for the generation of electricity and/or heat.

Disclosures in respect of section 85 of the German Securities Trading Act, the market abuse regulation and the Commission Delegated Regulation (EU) 2016/958

Section 85 of the German Securities Trading Act in combination with the European regulations requires an enterprise preparing a securities analyses to point possible conflicts of interest with respect to the company that is the subject of the analyses. Catalogue of potential conflicts of interest:

1. The Bank and/or its affiliate(s) own a net long or short position exceeding the threshold of 0,5% of the total issued share capital of the company that is the subject of the Research Document, calculated in accordance with Article 3 of regulation (EU) No 236/2012 and with Chapter III and IV of Commission Delegated Regulation (EU) No 918/2012
2. The company that is the subject of the Research Document owns 5% or more in the total issued share capital of the Bank and/or its affiliate(s)
3. The Bank and/or its affiliate(s) was Lead Manager or Co-Lead Manager over the previous 12 months of a public offering of analyzed company
4. The Bank and/or its affiliate(s) act as Market Maker or Designated Sponsor for the analyzed company
5. The Bank and/or its affiliate(s) over the previous 12 months has been providing investment banking services for the analyzed company for which a compensation has been or will be paid
6. The responsible analyst named in this report disclosed a draft of the analysis set forth in this Research Document to the company that is the subject of this Research Document for fact reviewing purposes and changes were made to this Research Document before publication
7. The Bank and/or its affiliate(s) effected an agreement with the analyzed company for the preparation of the financial analysis
8. The Bank and/or its affiliate(s) holds a trading position in shares of the analyzed company
9. The Bank and/or its affiliate(s) has other important financial interests in relation to the analyzed company

In relation to the security or financial instrument discussed in this analyses the following possible conflict of interest exists: (7)

The Bank have set up effective organizational administrative arrangements to prevent and avoid possible conflicts of interest and, where applicable, to disclose them. The Quirin research analysts involved in issuing research reports operate independently of Quirin Investment Banking business. Information barriers and procedures are in place between the research analysts and staff involved in securities trading for the account of Quirin or clients to ensure the price sensitive information is treated according to applicable laws and regulations.

The valuation underlying the rating of the company analyzed in this report is based on generally accepted and widely used methods of fundamental valuation, such as the DCF model, Free Cash Flow Value Potential, peer group comparison and – where applicable – a sum-of-the-parts model.

We do not commit ourselves in advance to whether and in which intervals an update is made. The document and the recommendation and the estimations contained therein are not linked – whether directly or indirectly – to the compensation of the analyst responsible for the document.

All share prices given in this equity analysis are closing prices from the last trading day before the publication date stated, unless another point in time is explicitly stated.

The rating in this report are based on the analyst's expectation of the absolute change in stock price over a period of 6 to 12 months and reflect the analyst's view of the potential for change in stock price as a percentage. The BUY and SELL ratings reflect the analyst's expected high change in the value of the stock.

The levels of change expressed in each rating categories are:

BUY > +10%

HOLD <=-10% and < = +10%

SELL > -10%.

Analyst certification

Ralf Marinoni, financial analyst, hereby certifies that all of the views expressed in this report accurately reflect my personal views about any and all of the subject securities or issuers discussed herein. In addition, I hereby certify that no part of my compensation was, is, or will be, directly or indirectly related to the specific recommendations or views expressed in this research report, nor is it tied to any specific investment banking transaction performed by the Bank or its affiliates.
