## ***Report on Review of Interim Condensed Consolidated Financial Statements***

To the Shareholders and the Supervisory Board of Sberbank of Russia

### **Introduction**

We have reviewed the accompanying interim consolidated statement of financial position of Sberbank of Russia and its subsidiaries (the "Group") as at 30 September 2017 and the related interim consolidated statements of profit or loss and comprehensive income for the three-month and nine-month periods then ended, interim consolidated statements of changes in equity and cash flows for the nine-month period then ended and selected explanatory notes. Management is responsible for the preparation and presentation of these interim condensed consolidated financial statements in accordance with International Accounting Standard 34 "Interim Financial Reporting". Our responsibility is to express a conclusion on these interim condensed consolidated financial statements based on our review.

### **Scope of Review**

We conducted our review in accordance with International Standard on Review Engagements 2410 "Review of Interim Financial Information Performed by the Independent Auditor of the Entity". A review of interim condensed consolidated financial statements consists of making inquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with International Standards on Auditing and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.

### **Conclusion**

Based on our review, nothing has come to our attention that causes us to believe that the accompanying interim condensed consolidated financial statements are not prepared, in all material respects, in accordance with International Accounting Standard 34 "Interim Financial Reporting".

## Selected Notes to the Interim Condensed Consolidated Financial Statements – 30 September 2017

---

### 1 Introduction

These interim condensed consolidated financial statements of Sberbank of Russia (Sberbank, the “Bank”) and its subsidiaries (together referred to as the “Group” or “Sberbank Group”) have been prepared in accordance with IAS 34 “Interim Financial Reporting” for the nine months ended 30 September 2017. Principal subsidiaries include Russian and foreign commercial banks and other companies controlled by the Group. A list of principal subsidiaries included in these interim condensed consolidated financial statements is disclosed in Note 34.

The Bank is a public joint-stock commercial bank established in 1841 and operating in various forms since then. The Bank was incorporated and is domiciled in the Russian Federation. The Bank’s principal shareholder, the Central Bank of the Russian Federation (the “Bank of Russia”), owns 52.3% of ordinary shares or 50.0% plus 1 share of the issued and outstanding ordinary and preferred shares as at 30 September 2017 (31 December 2016: 52.3% of ordinary shares or 50.0% plus 1 share of the issued and outstanding ordinary and preferred shares).

As at 30 September 2017 the Supervisory Board of the Bank is headed by Sergey M. Ignatiev, Chairman of the Bank of Russia in the period of 2002-2013. The Supervisory Board of the Bank includes representatives from both the Bank’s principal shareholder and other shareholders as well as independent directors.

The Bank operates under a general banking license issued by the Bank of Russia since 1991. In addition, the Bank holds licenses required for trading and holding securities and engaging in other securities-related activities, including acting as a broker, a dealer, a custodian. The Bank is regulated and supervised by the Bank of Russia as a united regulator for banking, insurance and financial markets activities in the Russian Federation. The Group’s banks/companies operate under the banking/companies regulatory regimes of their respective countries.

The Group’s principal business activity is corporate and retail banking. This includes, but is not limited to, deposit taking and commercial lending in freely convertible currencies, local currencies of countries where the subsidiary banks operate and in Russian Roubles, support of clients’ export/import transactions, foreign exchange, securities trading, and trading in derivative financial instruments. The Group’s operations are conducted in both Russian and international markets. ### 2 Operating Environment of the Group

The Group conducts its business in the Russian Federation, Turkey, Belarus, Kazakhstan, Ukraine, Austria, Switzerland and other countries of Central and Eastern Europe, and also conducts operations through a branch office in India, representative offices in Germany and China and companies of ex-Troika Dialog Group Ltd. located in the United States of America, the United Kingdom, Cyprus and certain other jurisdictions.

**Russian Federation.** The major part of the Group operations is conducted in the Russian Federation.

The Russian economy continued to recover in the first nine months of 2017. The economy has adapted to the deteriorated oil and gas market conjuncture and the international sectoral sanctions imposed against the Russian Federation. GDP dynamics returned to the positive zone and GDP growth in the nine months of 2017 is estimated at 1.8%<sup>1</sup> year-on-year while in the nine months of 2016 GDP declined by 0.4%<sup>2</sup> year-on-year.

Economic growth remained unstable. The annualized industrial output in the first nine months of 2017 increased by 1.8%<sup>2</sup> compared to the first nine months of 2016, when growth of industrial production amounted to 1.2%<sup>2</sup>. Positive growth was demonstrated by the cargo turnover of transport, which grew by 6.8%<sup>2</sup> year-on-year, compared to 1.8%<sup>2</sup> increase in the first nine months of 2016. The growth rate of agriculture sector slowed down to 3.8%<sup>2</sup> compared to 4.7%<sup>2</sup> in the first nine months of 2016. Construction sector decreased by 2.0%<sup>2</sup> versus a 3.1%<sup>2</sup> decrease in the first nine months of 2016.

The situation in the labour market has improved. The unemployment rate at the end of the third quarter 2017 decreased to 5.0%<sup>2</sup> versus 5.2%<sup>2</sup> in September 2016. The real accrued wages increased by 2.5%<sup>2</sup> in annual terms against growth by 0.4%<sup>2</sup> in the first nine months of 2016. At the same time the growth of wages in the economy is restrained by a low indexation of wages in the public sector. The real disposable income of households decreased by 1.2%<sup>2</sup> in annual terms according to the results of the three quarters of 2017. The households' income reduction rate decreased significantly compared to the first nine months of the previous year (5.6%<sup>2</sup> in annual terms) and 2016 as a whole (5.9%<sup>2</sup>). The income of households was supported by the growth of wages, indexation of pensions and one-time payments to pensioners. The retail sales increased by 0.5%<sup>2</sup> in the first nine months of 2017; in the same period of 2016 the decline in retail sales comprised 4.5%<sup>2</sup>.

The public's propensity to save continued to decline. The share of disposable income allocated to savings amounted to 7.1%<sup>2</sup> in January-August of 2017. This indicator slowed down significantly compared to the same period of 2016 (10.1%<sup>2</sup> of disposable income). The consumer confidence index which reflects the total consumer expectations of the public increased by 8.0% to (11.0)%<sup>2</sup> in the third quarter of 2017 compared to the third quarter of 2016.

Annualized inflation slowed down to 3%<sup>2</sup> in September 2017 versus 5.4%<sup>2</sup> in December 2016. The trend to lower inflation allowed the Bank of Russia to reduce the key rate step-by-step. In March 2017 the key rate was reduced by 25 basis points, in April 2017 by 50 basis points, in June 2017 by 25 basis points and in September 2017 by 50 basis points and reached 8.5% p.a. by the end of the third quarter. In October 2017 the key rate was further reduced by 25 basis points reaching 8.25% p.a.

### 2 Operating Environment of the Group (continued)

The average price for Urals oil for the three quarters period of 2017 amounted to 50.7 US dollars per barrel. The average oil price in the third quarter 2017 increased to 51.3 US dollars per barrel against 48 US dollars per barrel in the second quarter, but it remained below the average price of the first quarter 2017 which amounted to 52 US dollars per barrel. The average Russian Rouble exchange rate for the third quarter slightly weakened (59.0 Russian Roubles per 1 US dollar) compared to the second quarter of 2017 (57.1 Russian Roubles per 1 US dollar). The stability of the exchange rate is mainly due to the stability of oil prices. The average Russian Rouble exchange rate amounted to 58.3 Russian Roubles per US dollar in the first nine months of 2017.

The surplus in the current account of the balance of payments of the Russian Federation reached USD 26.6 billion<sup>1</sup> in January-September of 2017 (compared to USD 15.3 billion<sup>1</sup> in January-September of 2016). The rise in the surplus resulted from the increase in oil and gas export revenues due to higher oil prices compared to the first three quarters of 2016. The outflow of capital amounted to USD 21 billion<sup>1</sup> compared to USD 10 billion<sup>1</sup> in January-September of 2016. The outflow was formed mainly by repayment of liabilities of the banking sector. The external debt of the Russian Federation for the first nine months of 2017 increased by USD 23.3 billion<sup>1</sup> to USD 537.5 billion<sup>1</sup>.

In January-September of 2017 the Russian banking sector earned profit of RR 675.0 billion<sup>1</sup> versus RR 635.0 billion<sup>1</sup> in the first nine months of 2016. The profit of Russian banking sector decreased significantly compared to January-August of 2017 (RR 997.0 billion<sup>1</sup>) due to a one-off recognition of the negative financial result of the two large banking groups which have fallen under procedure of financial recovery. In January-September of 2017 assets of the Russian banking system adjusted for the foreign exchange revaluation increased by 5.1%<sup>1</sup> compared to the beginning of 2017. The loan portfolio of the banking sector increased by 4.3%<sup>1</sup> in the first nine months of 2017 due to growth in loans to non-financial organizations and individuals by 2.8%<sup>1</sup> and 8.4%<sup>1</sup> respectively (adjusted for the foreign exchange revaluation). In January-September of 2017 deposits of individuals increased by 5.2%<sup>1</sup>, while deposits and current accounts of corporate clients were stable<sup>1</sup> (adjusted for the foreign exchange revaluation). In January-September of 2017 the share of overdue loans in the corporate loan portfolio of Russian banking sector increased from 6.3%<sup>1</sup> to 6.6%<sup>1</sup>, and decreased in the retail loan portfolio - from 7.9%<sup>1</sup> to 7.5%<sup>1</sup>. Total amount of provisions for loan impairment increased by 13.6%<sup>1</sup> in January-September of 2017. Borrowings of the banking sector from the Bank of Russia declined 1.5 times<sup>1</sup>, while the volume of deposits attracted by banks from the Federal Treasury grew 4 times<sup>1</sup>.

The situation on the Russian stock markets has worsened. The RTS index decreased by 1.3% for the first nine months of 2017, the MICEX index decreased by 7%. Capitalization of the Bank in Russian Roubles increased by 11.3% during the first nine months of 2017.

International rating agencies improved the outlook for the sovereign credit ratings of the Russian Federation. In February 2017 Moody's agency changed the outlook from "negative" to "stable", keeping the rating at Ba1. In March 2017 Standard & Poor's agency changed the outlook from "stable" to "positive", keeping the rating at BB+. Fitch Ratings agency has affirmed the rating at BBB- but changed the outlook from "stable" to "positive" in September of 2017.

In February 2017 Moody's international rating agency changed the outlook for the long-term foreign currency deposit rating of the Bank from "negative" to "stable", keeping the rating at Ba2. Fitch Ratings agency has affirmed the rating of the Bank at BBB- but changed the outlook from "stable" to "positive" in September of 2017. In March 2017 the national rating agency ACRA (JSC) assigned the Bank the credit rating of AAA (RU) based on the national scale with the "stable" outlook.

**Other jurisdictions.** In addition to Russia the Group conducts operations in Belarus, Kazakhstan, Ukraine, Central and Eastern Europe (Austria, Czech Republic, Bosnia and Herzegovina, Slovenia, Serbia, Hungary, Croatia), Turkey, Switzerland and some other countries.

### 2 Operating Environment of the Group (continued)

For the nine months of 2017 GDP of Belarus increased by 1.7%<sup>1</sup> year-on-year against a decrease of 2.9%<sup>1</sup> for the same period of the previous year. Industrial output in January-September of 2017 increased by 6.1%<sup>1</sup> year-on-year, and annualized retail sales showed an increase of 2.4%<sup>1</sup> for the nine months of 2017. Inflation showed mixed dynamics, amounting to 4.9%<sup>1</sup> p.a. in September 2017 which allowed the National Bank of the Republic of Belarus to reduce the refinancing rate step-by-step to 11%<sup>2</sup> p.a.

During the nine months of 2017, Kazakhstan's economy continued to recover gradually. GDP, according to preliminary estimates, increased by 4.3%<sup>3</sup> year-on-year. Positive dynamics was mainly due to growth in oil prices in January-September 2017 year-on-year and to the growth of oil extraction. The industrial output increased by 8.3%<sup>4</sup> in annual terms, trade industry increased by 3.0%<sup>4</sup>, construction industry - by 3.5%<sup>4</sup>, transport - by 4.7%<sup>4</sup>, agriculture industry - by 1.9%<sup>4</sup>. The industrial output is supported by high oil prices, construction industry - by infrastructure projects, trade - by a restoration of consumer activity of the public and revival of lending. During January-September of 2017 inflation slowed down to the level of 7.1%<sup>4</sup> in annual terms, which allowed the National Bank of the Republic of Kazakhstan to reduce the base rate to 10.25%<sup>5</sup>.

For Ukraine the nine months of 2017 period was characterized by a high level of political and economic uncertainty. The industrial output decreased by 0.3%<sup>6</sup> in annual terms for the nine months of 2017. Inflation in September of 2017 accelerated to 16.4%<sup>6</sup> p.a. In March 2017 the Decree of the President of Ukraine put in force the decision of National Security and Defense Council of Ukraine to impose for a period of one year special economic and other restrictive actions (hereafter “sanctions”) against a number of Ukrainian banks which are owned by Russian banks with state participation including subsidiary banks of the Group. Sanctions are applied to a number of operations and withdrawal of capital from Ukraine in favour of related parties of subjects under sanctions. As at 30 September 2017, the Group's exposure to Ukrainian risk amounted to approximately 0.1% of total consolidated assets (31 December 2016: 0.1%). The exposure consists of net assets of and the Group funding to the Group's Ukrainian subsidiaries, as well as exposure of the Group (excluding that of its Ukrainian subsidiaries) to equity and debt instruments issued by and loans to the Ukrainian government and corporate clients.

The economic situation in Turkey in the first nine months of 2017 can be characterized as positive. Economic growth is recovering, the lira exchange rate has strengthened since the beginning of the year. Against this background inflation remains at the level of just above 11%. Foreign policy uncertainty factor remains in the country.

The economic situation in the countries of Central and Eastern Europe has improved in the first nine months of 2017, mainly due to the acceleration of growth in the euro zone. Economic growth was supported by low interest rates in the economy and revival of domestic demand.

### 4 Accounting Policies, Critical Accounting Estimates and Judgements, Adoption of Revised Standards, and Reclassifications

The accounting policies and methods of computation applied in the preparation of these interim condensed consolidated financial statements are consistent with those disclosed in the annual consolidated financial statements of the Group for the year ended 31 December 2016, except for income tax expense which is recognized in these interim condensed consolidated financial statements based on management's best estimates of the weighted average income tax rate expected for the full financial year, and except for the changes introduced due to implementation of new and/or revised standards and interpretations as at 1 January 2017 or as at the date indicated, noted below:

**Disclosure Initiative – Amendments to IAS 7** (issued on 29 January 2016 and effective for annual periods beginning on or after 1 January 2017). The amended IAS 7 requires disclosure of a reconciliation of movements in liabilities arising from financing activities. The disclosure will be applicable for the first time to the Group's consolidated financial statements for the annual period ended 31 December 2017.

**Recognition of Deferred Tax Assets for Unrealized Losses – Amendments to IAS 12** (issued on 19 January 2016 and effective for annual periods beginning on or after 1 January 2017). The amendment has clarified the requirements on recognition of deferred tax assets for unrealized losses on debt instruments. The entity will have to recognize deferred tax asset for unrealized losses that arise as a result of discounting cash flows of debt instruments at market interest rates, even if it expects to hold the instrument to maturity and no tax will be payable upon collecting the principal amount. The economic benefit embodied in the deferred tax asset arises from the ability of the holder of the debt instrument to achieve future gains (unwinding of the effects of discounting) without paying taxes on those gains.

**Annual Improvements to IFRSs 2014-2016 cycle - Amendments to IFRS 12** (issued on 8 December 2016 and effective for annual periods beginning on or after 1 January 2017). The amendments clarify the scope of the disclosure requirements in IFRS 12 by specifying that the disclosure requirements in IFRS 12, other than those relating to summarised financial information for subsidiaries, joint ventures and associates, apply to an entity's interests in other entities that are classified as held for sale or discontinued operations in accordance with IFRS 5.

The above mentioned amended standards effective for the Group from 1 January 2017 did not have a material impact on the accounting policies, financial position or performance of the Group in the interim condensed consolidated financial statements.

**Management's estimates and judgements.** Judgements and critical estimates made by Management in the process of applying the accounting policies were consistent with those disclosed in the annual consolidated financial statements for the year ended 31 December 2016. Management has not identified new areas of judgement or critical estimates.

Beginning from the first quarter of 2017 as a result of accumulation of additional data on repayment of defaulted loans and on recovery of loans through disposal of collateral, the Group introduced amendments to the probability of default valuation models and to loss given default valuation models applied for certain retail loan products of the Bank (mortgage and consumer loans). These amendments led to a decrease in the amount of provision for loan impairment as at the date of transition (1 January 2017) by RR 4.3 billion which had an effect on the interim consolidated statement of profit or loss for the three months ended 31 March 2017. The main effect on the result of calculation is related to more conservative definition of default in relation to restructured loans, which led to an increase in probability of default (PD) and to a decrease in loss given default (LGD).

Based on the analysis of actual useful lives of premises and equipment as at 1 January 2017 the Bank adjusted the estimates in relation to remaining useful lives of premises and equipment of the Bank. The amendments were applied to all the types of premises and equipment. Should the Bank not apply these amendments, depreciation of premises and equipment for the nine months of 2017 would be RR 12.3 billion higher.

From 1 January 2017 the Bank improved the methodology for the allocation of amounts due to individuals and corporate customers among time bands for the purposes of liquidity risk management. Comparative information as at 31 December 2016 was changed accordingly. Refer to Note 27.

### **7 Loans and Advances to Customers (continued)**

For the purposes of these interim condensed consolidated financial statements a loan is considered past due when the borrower fails to make any payment due under the loan agreement at the reporting date. In this case the aggregate amount of all amounts due from borrower under the respective loan agreement including accrued interest and commissions is recognized as past due.

Commercial loans to legal entities comprise corporate loans, loans to individual entrepreneurs, federal bodies and municipal authorities. Loans are granted for current needs (working capital financing, acquisition of movable and immovable property), portfolio investments, expansion and consolidation of business, etc. Majority of commercial loans are provided for periods up to 5 years depending on the borrowers' risk assessment. Commercial lending also includes overdraft lending and lending for export-import transactions. The repayment source is cash flow from current production and financial activities of the borrower.

Specialized loans to legal entities include investment and construction project financing and also developers' financing. As a rule, loan terms are linked to payback periods of investment and construction projects, contract execution periods and exceed the terms of commercial loans to legal entities. The principal and interest may be repaid from cash flows generated by the investment project at the stage of its commercial operation.

Mortgage loans to individuals include loans for acquisition, construction and reconstruction of real estate. These loans are mostly long-term and are collateralized by real estate.

Consumer and other individual loans comprise loans to individuals other than housing acquisition, construction and repair of real estate as well as car loans and credit cards and overdrafts. These loans include loans for current needs.

Credit cards and overdrafts to individuals represent revolving credit lines. These loans are considered a comfortable instrument for customers as a reserve source of funds in case of need available everywhere and anytime. Interest rates for such loans are higher than for consumer loans as they carry higher risks for the Group.

Car loans to individuals include loans for purchasing a car or other vehicle. Car loans are provided for up to 5 years periods.

**Restructured loans.** Renegotiated loan portfolio of the Group consists of “modified” and “restructured” loans. A loan is considered renegotiated if terms of the original loan contract have been changed.

Modified loans represent loans with changes to the initial loan terms caused by changes in market conditions, changes in a product, client requests or reclassified out of the restructured loan portfolio provided reclassifications terms are met, i.e. where loan renegotiation is not considered as distressed.

Restructured loans represent loans which were distressed at the moment of the renegotiation. A loan is initially classified as a restructured loan if:

- The renegotiation is in favor of a borrower due to its inability to fulfill obligations and the borrower is assigned high / medium credit risk. Renegotiation is considered to be in favor of the borrower if, for example, frequency of loan repayments is reduced, interest rate is reduced, loan tenor or limit are extended, amount of total loan payments is reduced, loan payments are rescheduled for later dates, etc., or
- Refinancing of a loan is due to inability of the borrower to fulfill its obligations and the borrower is assigned high / medium credit risk.

Features of a high / medium credit risk borrower which are examined by the Group may include but are not limited to the following: the borrower’s obligations are overdue for a period of more than 30 calendar days, non-compliance with a loan collateralization requirements by 30%, initiation of bankruptcy proceeding in respect of the borrower, change / replacement of the key management and/or owners, etc.

### 9 Investment Securities Available-for-Sale (continued)

In April - May 2017 the Group together with the Agency for Housing Mortgage Lending (the "AHML") acting through a subsidiary of AHML, LLC "MBS Factory" (the "MBSF") arranged the following securitization transaction:

- The Bank sold to the MBSF a portfolio of mortgage loans to individuals, which were derecognized by the Group based on the terms of the deal and a related gain on the disposal in the amount of RR 4.6 billion was recorded within net gains on initial recognition of financial instruments, loans restructuring and sale of loans;
- The MBSF issued mortgage-backed amortising securities with nominal value of RR 50.0 billion (the "Bonds"). The Bonds were issued in one tranche with the final original maturity in September 2049. The Bonds are secured by the mortgage loans to individuals, purchased by the MBSF from the Bank, and guarantee of AHML, which also took the commitment to purchase defaulted mortgage loans at nominal value. Interest rate and amortization of the principal under the Bonds are based on repayments of mortgage loans which secure the Bonds.
- The Bonds were purchased by the Group and were recognized as investment securities available-for-sale in the interim consolidated statement of financial position as at 30 September 2017.

Included into net gains from investment securities available-for-sale in the interim consolidated statement of profit or loss for the nine months ended 30 September 2017 there is a gain of RR 15.3 billion from the sale of VISA Inc. and MasterCard Inc. shares in March 2017.

### 18 Subordinated Debt (continued)

Description of the subordinated debt received by the Group from the Bank of Russia is presented in the table below:

Drawdown date	Interest rate repricing date	Currency	Nominal value in currency of issue, in millions	Contractual interest rate, % p.a.	30 September 2017 (unaudited)		31 December 2016	
					Carrying value, in billions of RR	Effective interest rate, % p.a.	Carrying value, in billions of RR	Effective interest rate, % p.a.

<b>Total subordinated debt received from the Bank of Russia</b>					<b>528.7</b>		<b>504.4</b>	

In March 2015, following the amendments to the Federal Law of the Russian Federation “On additional measures for supporting the financial system of the Russian Federation” terms and conditions of the subordinated loans received from the Bank of Russia in the total nominal value of RR 500.0 billion were modified. As it was allowed by the Federal Law the Bank elected to prolong these subordinated loans for 50 years from the date of the original drawdown with an ability to unilaterally (without consent from Bank of Russia) roll over this subordinated facility at its maturity. The subordinated loan facility bears an interest rate of 6.5% p.a. Based on the terms and conditions of the modified subordinated loan the interest rate can be reset after 31 December 2019.

The Group considers that the terms of initial financial instruments previously reported by the Group were not significantly modified. On the repricing date the Group will reassess its judgement provided the conditions of the subordinated loans are substantially revised.

Description of the subordinated debt issued under the MTN programme of Sberbank is presented in the table below:

Issue	Drawdown date	Maturity date	Currency	Nominal value in currency of issue, in millions	Contractual interest rate, % p.a.	30 September 2017 (unaudited)		31 December 2016

<b>Total subordinated debt issued under the MTN programme of Sberbank</b>						<b>196.8</b>		<b>204.7</b>	

During the nine months ended 30 September 2016 the Group repurchased a portion of the subordinated loan participation notes issued under the MTN programme from the market. The gains from early redemption of these notes were presented within other net operating income in the interim consolidated statement of profit or loss in the amount of RR 0.5 billion.

In the event of the Bank’s liquidation the claims of the holders of the subordinated debt would be subordinated to all other creditors.

<b>The Group's profit before tax under IFRS</b>	<b>718.4</b>	<b>497.7</b>	<b>279.4</b>	<b>170.3</b>

The differences shown above arise from classification variances as well as different accounting policies.

Adjustment of provisions is related to the difference between methodology applied in statutory accounting records used primarily as a basis for management reporting and IFRS impairment methodology.

Differences arising on securities' classification relate to gains/(losses) on revaluation of securities designated as at fair value through profit or loss in IFRS reporting but classified as available-for-sale in statutory accounting records.

The sum of the line Accounting for derivatives at fair value mainly includes adjustments to reflect recognition of embedded derivatives in the interim consolidated statement of financial position, the creation of CVA/DVA and the bid/offer provisions, as the necessary components of fair value.

For the nine months ended 30 September 2017 the Group's revenues from customers in the Russian Federation amounted to RR 2,166.2 billion (for the nine months ended 30 September 2016: RR 2,014.6 billion); revenues from customers in all foreign countries from which the Group derives revenues amounted to RR 232.0 billion (for the nine months ended 30 September 2016: RR 289.2 billion). For the nine months ended 30 September 2017 intersegment revenues amounted to RR 94.1 billion (for the nine months ended 30 September 2016: RR 41.2 billion).

For the three months ended 30 September 2017 the Group's revenues from customers in the Russian Federation amounted to RR 718.9 billion (for the three months ended 30 September 2016: RR 649.2 billion); revenues from customers in all foreign countries from which the Group derives revenues amounted to RR 82.7 billion (for the three months ended 30 September 2016: RR 94.7 billion). For the three months ended 30 September 2017 intersegment revenues amounted to RR 36.5 billion (for the three months ended 30 September 2016: RR 13.5 billion).

No revenue from transactions with a single external customer or counterparty amounted to 10.0% or more of the Group's total revenue during the nine months and the three months ended 30 September 2017 and 30 September 2016.

### 27 Financial Risk Management

The Bank manages all significant types of risk for the Group, which are identified annually as a result of ongoing procedures for identification and evaluation of significant risks. The Group recognizes following significant types of risks: credit risk of corporate and retail customers, country risk, credit risk of financial institutions, liquidity risk, market risks on the operations on financial markets (interest rate risk, currency risk, commodity risk, risk of market credit spread, volatility risk), the risk of loss due to changes in value of real estate, legal and compliance risk, reputation risk, risk of models, risk of cybersecurity, operational, strategic, regulatory and tax risks. The Group's risk management policies are designed to identify and analyze these risks, to set appropriate risk limits and controls, and to monitor the risks and limits. The operational risk management functions are intended to ensure proper functioning of internal policies and procedures to minimize operational risk.

The Group's risk management policies and procedures are consistent with those disclosed in the annual consolidated financial statements of the Group for the year ended 31 December 2016.

**Currency risk.** Currency risk results from fluctuations in the prevailing foreign currency exchange rates. The Group is exposed to foreign exchange risk on open positions, mainly US dollar/Russian Rouble and Euro/Russian Rouble exchange rate fluctuations.

Foreign exchange risk on forward and futures contracts is represented by their discounted positions. Foreign exchange options are disclosed in the amount that reflects theoretical sensitivity of their fair value to reasonable change in exchange rates. Commodity options are shown at their fair value in relative settlement currency. Equity instruments are classified based on the country of origin of issuer.

The table below summarizes the Group's exposure to foreign exchange risk in respect of financial assets, liabilities and derivatives as at 30 September 2017.

### 27 Financial Risk Management (continued)

**Liquidity risk.** Liquidity risk is defined as the risk of inability of the Group to finance its performance, i.e. to ensure the growth of assets and/or fulfill its obligations as far as they arise on the condition of compliance to the requirements of the local regulator in the normal course of business as well as during stress situations. The Group is exposed to daily calls on its available cash resources from interbank overnight deposits, customer's current accounts, term deposits, loan drawdowns, guarantees, margin calls and on cash settled derivative instruments.

Principles that are used to analyze liquidity position presentation and manage the Group liquidity risk management are based on the Bank's of Russia prudential initiatives and the Bank's practice:

- cash and cash equivalents represent highly liquid assets and are classified as "On demand and less than 1 month";
- trading securities, securities designated as at fair value through profit or loss and highly liquid portion of investment securities available-for-sale are considered to be liquid assets as these securities could be easily converted into cash within short period of time. Such financial instruments are disclosed in the analysis of liquidity position as "on demand and less than 1 month";
- investment securities available-for-sale which are less liquid are disclosed according to remaining contractual maturities (for debt instruments) or as "No stated maturity / overdue" (for equities);
- investment securities held-to-maturity including those pledged under repurchase agreements are classified based on the remaining contractual maturities;
- highly liquid portion of securities pledged under repurchase agreements is disclosed based on the remaining maturities of repurchase agreements;
- loans and advances to customers, amounts due from banks, other assets, debt securities in issue, amounts due to banks, other borrowed funds and other liabilities are included into analysis of liquidity position based on remaining contractual maturities (for loans and advances to customers "No stated maturity / overdue" category represents only actual payments which were overdue);
- term deposits of individuals are not disclosed as "On demand and less than 1 month" in full amount although individuals have a right to withdraw money from any account, including term deposits, before maturity date, losing the right to accrued interest;
- diversification of balances due to individuals and corporate customers by number and type of depositors and the past experience of the Group indicate that such balances provide a long-term and stable source of funding irrespective of their contractual maturities. As a result in the analysis of liquidity position balances due to individuals and corporate customers are allocated on the basis of expected time of funds outflow which is based on statistical data accumulated by the Group during the previous periods and assumptions regarding the "permanent" part of current account balances;
- assets and liabilities other than those discussed above are generally classified on the basis of their contractual maturities.

## Selected Notes to the Interim Condensed Consolidated Financial Statements – 30 September 2017

---

### 28 Contingencies and Commitments

**Legal proceedings.** From time to time and in the normal course of business, claims against the Group are received. On the basis of its own estimates and internal professional advice the Management is of the opinion that no material losses will be incurred in respect of the claims in excess of the amounts already provided for in these interim condensed consolidated financial statements. For the movements in the provision for legal claims refer to Note 17.

PPF Management LLC filed a claim in the US District Court of the Southern District of New York against the Bank for reimbursement of damages in the amount of USD 750 million caused according to the plaintiff by withdrawal of shares of OJSC Pavlovskgranit from the owner. The Bank acted strictly in accordance with the Russian legislation and in the best interest of the Bank's shareholders during the recovery of the non-performing loan, which is confirmed by subsequent decisions in the courts of the Russian Federation. In accordance with the decision of the Bankruptcy Court of the Southern District of New York dated 31 July 2017 the bankruptcy procedure against S.P. Poymanov (former shareholder of OJSC Pavlovskgranit) which was initiated and put into force on the territory of the Russian Federation, was recognized in the United States; financial manager of S.P. Poymanov was declared as his authorized representative. Also, on 31 July 2017 Arbitrage court of the Moscow region within the bankruptcy procedure against S.P. Poymanov declared void the transaction for transfer of rights of claim by S.P. Poymanov in favour of PPF Management LLC which were the basis for the claim for reimbursement of damages in the amount of USD 750 million. This decision was left unchanged by Resolution of the Tenth Arbitrage Court of Appeal dated 17 October 2017. Taking into consideration among others these circumstances the management and legal advisors of the Bank assess the risk of outflow of economic resources on PPF Management LLC claim as insignificant.

PJSC Transneft filed a claim in the Moscow Arbitration Court against the Bank demanding to void the derivative deal concluded between the plaintiff and the Bank under the General Agreement for Derivative Transactions on the financial markets. The risk exposure on the contested transaction is about RR 66 billion. The deal was closed by the parties, but according to PJSC Transneft, the Bank acted unfairly at the inception of the transaction. In June 2017 the court of first instance satisfied the plaintiff's claim, but the management of the Bank (based on the relevant documents on the transaction) does not have grounds to agree with the plaintiff's position and the decision of the court of first instance. The Group has appealed the decision of the court of first instance. In August 2017 the court of appeal satisfied an appeal of the Bank and cancelled fully the decision of the court of first instance. In October 2017 PJSC Transneft filed a cassational appeal against the decision of the court of appeal. The Group does not expect a significant outflow of economic resources on the lawsuit.

Moscow Prosecutor's office filed a claim in the Moscow Arbitration Court against the Bank and a customer of the Bank (together - parties) to void the derivative deals concluded between the parties. The Bank's management examined the circumstances of the case, the existing documentation and the Bank estimates the outflow of resources on this lawsuit as possible. In relation to this claim the Group booked a provision in the amount of expected losses.

**Credit related commitments and performance guarantees.** The primary purpose of credit related commitments instruments is to ensure that funds are available to a customer when required. Financial guarantees and standby letters of credit, which represent irrevocable assurances that the Group will make payments in the event that a customer can not meet the obligations to third parties, carry the same credit risk as loans. Documentary and commercial letters of credit, which are written undertakings by the Group on behalf of a customer authorizing a third party to draw drafts on the Group up to a stipulated amount under specific terms and conditions, are collateralized by the underlying shipments of goods to which they relate or cash deposits and therefore carry less risk than direct lending.

Commitments to extend credit represent unused portions of authorizations to extend credit. With respect to credit risk on commitments to extend credit, the Group is potentially exposed to a loss equal to the total amount of unused commitments. However, the likely amount of loss is less than the total unused commitments since most commitments to extend credit are contingent upon customers maintaining specific credit standards. The Group monitors the maturities of credit related commitments because longer-term commitments generally have a greater degree of credit risk than shorter-term commitments.

### 28 Contingencies and Commitments (continued)

Performance guarantees are contracts that provide compensation if another party fails to perform a contractual obligation. Such contracts do not transfer credit risk. The risk under performance guarantee contracts is the possibility that the insured event (i.e. the failure to perform the contractual obligation by another party) occurs. The key risks the Group faces are significant fluctuations in the frequency and severity of payments incurred on such contracts relative to expectations. The Group uses historical data and statistical techniques to predict levels of such payments. Claims must be made before the contract matures and most claims are settled within short term. This allows the Group to achieve a high degree of certainty about the estimated payments and therefore future cashflows. The Group manages such risks by constantly monitoring the level of payments for such products and has the ability to adjust its fees in the future to reflect any change in claim payments experience. The Group has a claim payment requests handling process which includes the right to review the claim and reject fraudulent or non-compliant requests.

Outstanding credit related commitments and performance guarantees are as follows:

<i>in billions of Russian Roubles</i>	<b>30 September 2017 (unaudited)</b>	<b>31 December 2016</b>
Commitments to extend credit	1,888.9	1,856.0
Guarantees issued:		
- Financial guarantees	1,095.2	1,132.4
- Performance guarantees	550.8	520.6
Undrawn credit lines	884.2	768.7
Export letters of credit	211.1	307.9
Import letters of credit and letters of credit for domestic settlements	183.4	173.0
<b>Total credit related commitments and performance guarantees before provision</b>	<b>4,813.6</b>	<b>4,758.6</b>
Less provision	(22.0)	(16.1)
<b>Total credit related commitments and performance guarantees after provision</b>	<b>4,791.6</b>	<b>4,742.5</b>

As at 30 September 2017 included in due to corporate customers are deposits of RR 121.9 billion (31 December 2016: RR 102.7 billion) held as collateral for irrevocable commitments under import letters of credit. Refer to Note 14.

The total outstanding contractual amount of undrawn credit lines, letters of credit and guarantees does not necessarily represent future cash payments, as these instruments may expire or terminate without any payments being made.

For the movements in the provision for impairment of credit related commitments and performance guarantees refer to Note 17.

### 29 Fair Value Disclosures

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date.

The Group uses the following hierarchy for determining and disclosing the fair value of financial instruments by valuation technique:

- Level 1: quoted (unadjusted) prices in active markets for identical assets or liabilities;
- Level 2: techniques for which all inputs which have a significant effect on the recorded fair value are observable, either directly or indirectly; and
- Level 3: techniques which use inputs which have a significant effect on the recorded fair value that are not based on observable market data.

## Selected Notes to the Interim Condensed Consolidated Financial Statements – 30 September 2017

### 29 Fair Value Disclosures (continued)

Level 2 includes debt securities of first-class borrowers and derivative financial instruments that are not actively traded on the market. Fair value of these financial instruments was calculated using techniques for which all inputs which have a significant effect on the recorded fair value are observable on the active market. Financial characteristics of comparable financial instruments actively traded on the market were used as inputs for the fair valuation models.

The following describes the methodologies and assumptions used to determine fair values for financial instruments.

#### *Derivatives*

Derivatives valued using a valuation technique with market observable inputs derived from well-known market information systems are mainly foreign currency interest rate swaps, interest rate swaps, currency swaps, forward foreign exchange contracts and foreign exchange option contracts. The most frequently applied valuation techniques include forward pricing and swap models, using present value calculations. Option-pricing is mostly done with Black-Scholes model and for certain types of options with stochastic local volatility model. The models incorporate various inputs including the credit quality of counterparties, foreign exchange spot and forward rates, interest rate curves and implied volatility. In rare exceptional cases, DCF model may be applied, in case where it is impossible to obtain market data.

#### *Trading securities, securities designated as at fair value through profit or loss and investment securities available-for-sale*

Trading securities, securities designated as at fair value through profit or loss and investment securities available-for-sale valued using a valuation technique or pricing models primarily consist of unquoted equity and debt securities. These securities are valued using models based on observable market data and models based on both observable and non-observable market data. The non-observable inputs to the models include assumptions regarding the future financial performance of the investee, its risk profile, and economic assumptions regarding the industry and geographical jurisdiction in which the investee operates.

The following table shows transfers between Level 1 and Level 2 of the fair value hierarchy for financial assets measured as at fair value during the nine months ended 30 September 2017:

### 29 Fair Value Disclosures (continued)

The financial instruments are transferred from Level 2 and Level 3 to Level 1 when they become actively traded and fair values are determined using quoted prices in an active market.

The financial instruments are transferred from Level 1 to Level 2 when they ceased to be actively traded, the liquidity of the market is not sufficient to use the market quotation for the valuation and fair values are consequently obtained from valuation techniques using observable market inputs.

The financial instruments are transferred to Level 3 when they ceased to be actively traded and there is no possibility to use valuation techniques with observable market inputs.

The following table shows a reconciliation of the opening and closing amount of Level 3 assets which are recorded as at fair value as at 30 September 2017:

<i>(unaudited)</i> <i>in billions of Russian Roubles</i>	At 31 December 2016 <i>(audited)</i>	Total gains/ (losses) reported in profit or loss	Foreign currency revaluation	Total gains reported in other compre- hensive income	Purchases	Sales/ Settlements	Transfers from Level 3	At 30 September 2017

For the nine months ended 30 September 2017 the losses in the amount of RR 0.6 billion reported in the interim consolidated statement of profit or loss on Level 3 financial assets were unrealized.

For the nine months ended 30 September 2017 the gains in the amount RR 0.6 billion reported in the interim consolidated statement of comprehensive income on Level 3 financial assets were unrealized.

Total gains recognized as profit or loss on securities designated as at fair value through profit or loss which are presented in the table above are reported in the interim consolidated statement of profit or loss within net gains from securities designated as at fair value through profit or loss.

Total losses recognized as profit or loss on investment securities available-for-sale which are presented in the table above are reported in the interim consolidated statement of profit or loss within net gains from investment securities available-for-sale.

Total losses recognized as profit or loss on office premises which are presented in the table above are reported in the interim consolidated statement of profit or loss within operating expenses.

#### **Valuation of mortgage-backed securities of RR 49.5 billion using valuation techniques based on non-observable inputs**

The model uses a number of observable and unobservable inputs to derive a valuation. Examples of such include Russian mortgage rates and the credit spread for Agency for Housing Mortgage Lending (the "AHML") (all considered observable), while portfolio aging period and behavioral adjustment on refinancing position are examples of unobservable inputs.

Should the Russian mortgage rate used by the Group (published by the Bank of Russia) in the valuation model increase / decrease by 1.0%, the carrying value of the financial instrument would be RR 0.01 billion higher / RR 0.04 million lower. Should the AHML credit spread used by the Group in the valuation model increase / decrease by 1.0%, the carrying value of the financial instrument would be RR 1.4 billion lower / RR 1.4 billion higher.

## Selected Notes to the Interim Condensed Consolidated Financial Statements – 30 September 2017

### 29 Fair Value Disclosures (continued)

#### Valuation of share in a real estate company of RR 8.4 billion using valuation techniques based on non-observable inputs

The Group determined fair value of investments based on discounted cash flow model using the following key assumptions: weighted average cost of capital (WACC) and estimated capitalization rate (CapRate) which depend on forecasts on property prices. WACC as at 30 September 2017 is 12.0%, CapRate – 8.75%.

Should the discount rate used by the Group in the valuation model increase / decrease by 1.0%, the carrying value of the financial instrument would be RR 1.2 billion lower / RR 1.1 billion higher. Should the capitalization rate used by the Group in the valuation model increase / decrease by 1.0%, the carrying value of the financial instrument would be RR 1.2 billion lower / RR 1.6 billion higher.

#### Valuation of non-voting share in a special investment fund (SIF) with investments in oil companies of RR 5.3 billion using valuation techniques based on non-observable inputs

The Group determined fair value of investments based on discounted cash flow model using the following key assumptions: WACC and estimated guaranteed fixed yield on exit. Guaranteed fixed yield is not linked to the market and so has immaterial influence on the value of the financial instrument. WACC as at 30 September 2017 is 13.5%.

Should the discount rate used by the Group in the valuation model increase / decrease by 1.0%, the carrying value of the financial instrument would be RR 0.06 billion lower / RR 0.06 billion higher.

#### Valuation of investment in a mining company of RR 4.9 billion using valuation techniques based on non-observable inputs

Fair value of investments was determined based on net assets value, while valuation of the investments in the company's operational subsidiaries was based on discounted cash flow model using the following key assumptions: WACC, operational expenses, cost of investments, price and volume of sale.

WACC of operational companies as at 30 September 2017 is 14.2%, 16.2%, 16.3%, 16.5% and 18.8%. Should the discount rate used by the Group in the valuation model increase / decrease by 1.0%, the carrying value of the financial instrument would be RR 0.3 billion lower / RR 0.3 billion higher.

#### Valuation of share in a real estate company of RR 2.0 billion using valuation techniques based on non-observable inputs

Fair value of 16 properties with a total area of 102 000 square meters was based on market value of real estate units using average market price for one square meter of real estate properties (39 thousand Russian Roubles). Should the average market price for square meter of real estate used by the Group in the valuation model increase / decrease by 1.0%, the carrying value of the financial instrument would be RR 0.02 billion higher / RR 0.02 billion lower.

The following table shows a reconciliation of the opening and closing amount of Level 3 assets which are recorded as at fair value as at 31 December 2016:

For the three months ended 30 September 2017, interest expense on deposits attracted from key management personnel and their close family members comprised RR 0.1 billion (for the three months ended 30 September 2016: RR 0.3 billion).

For the nine months ended 30 September 2017, regular remuneration of the members of the key management personnel comprised salaries and bonuses totaling RR 3.1 billion (for the nine months ended 30 September 2016: RR 2.2 billion). For the three months ended 30 September 2017, remuneration of the members of the key management personnel comprised salaries and bonuses totaling RR 1.0 billion (for the three months ended 30 September 2016: RR 0.7 billion).

Also in 2015 the Bank has introduced a long term cash settled motivation program for the key management personnel with share-based features. The program has been designed within a framework of risk oriented remuneration and is in full compliance with the requirements of the Bank of Russia on the remuneration system for Russian credit institutions. The program parameters are as follows:

- 40% of the variable part of the annual compensation is deferred and is paid in 3 annual installments;
- payments to the participants of the program are contingent upon the Bank's positive performance, e.g. if the Bank has a loss in any of the 3 years following the year in which the award was granted, payments to the participants are forfeited for that particular year;
- awards may be fully or partially forfeited, for example, due to individual misconduct (including a breach of regulations) or termination for cause and also due to negative individual contributions to the Bank's results.

For the nine months ended 30 September 2017 share-based long term compensation has amounted to RR 1.7 billion (for the nine months ended 30 September 2016: RR 1.3 billion). For the three months ended 30 September 2017 share-based long term compensation has amounted to RR 0.8 billion (for the three months ended 30 September 2016: RR 0.5 billion).

Share-based long term compensation is payable in cash, and is remeasured at each reporting date based on the forward price of the Bank's ordinary shares. Payables on share-based long term compensation as at 30 September 2017 amounted to RR 3.0 billion (31 December 2016: RR 1.3 billion). The related obligations are included in other financial liabilities in the interim consolidated statement of financial position until paid.

### 35 Capital Adequacy Ratio

The Group's objectives when managing capital are (i) to comply with the regulatory capital requirements set by the Bank of Russia and (ii) to safeguard the Group's ability to continue as a going concern.

According to requirements set by the Bank of Russia regulatory capital ratio N1.0 has to be maintained by the Bank above the minimum level of 8.0% (31 December 2016: 8.0%). As at 30 September 2017 this regulatory capital adequacy ratio N1.0 was 14.5% (31 December 2016: 13.6%).

The Group also monitors capital adequacy ratio based on requirements of Basel Committee of Banking Supervision "Basel III: A global regulatory framework for more resilient banks and banking systems" (December 2010, updated in June 2011), commonly known as Basel III requirements. According to Basel III requirements minimum level of capital adequacy ratio is 6.0% for Tier 1 capital and 8.0% for total capital.

Capital adequacy ratio of the Group calculated in accordance with Basel III requirements as at 30 September 2017 and 31 December 2016 is disclosed below.

### 35 Capital Adequacy Ratio (continued)

The requirements of the national regulator (the Bank of Russia Instruction № 180-E “Mandatory bank ratios” dated 28 June 2017) were applied in the calculation of risk weighted assets where Basel III requirements allow to apply such national regulator requirements. In particular such approach was used for the following main types of assets:

- government and municipal debt financial instruments of the Russian Federation and its subjects nominated and funded in Russian Roubles;
- specific types of loans to which higher risk weights are applied in accordance with the Bank of Russia requirements;
- correspondent accounts and mandatory cash balances with the Bank of Russia.
